FOREWORD

This is a modest study on some of the 13 videos nominated by the US Intelligence Community and similar documentation.

Since the moment where some families of abducted children contacted us to inform us that they recognized their children among those who are presented in the videos as victims of the Chemical Attacks in East Ghouta, we decided to examine the videos thoroughly. We have restricted ourselves from treating medical or geospatial issues because it needs experts. Our work was limited to our simple observation of the videos from a sociological and a scenographical point of view.

We found that, as a whole, the videos present a clear absence of a normal Syrian family life, with no signs of the presence of a resident civilian population. While the proliferation of young males and children everywhere, dead or alive, let us wonder who they are and what they are doing in East Ghouta without their families?

Our first concern was the fate of the children we see in the footages. Those angels are always alone in the hands of adult males that seem to be elements of armed gangs. The children that trespassed remain without their families and unidentified all the way until they are wrapped in the white shrouds of the burial. Moreover, our study highlight without any doubt that their little bodies were manipulated and disposed with theatrical arrangements to figure in the screening.

Thus we accuse the editors of the videos of artificial scenic treatment of what should have been honest information footage. The cynic manipulation of the little inanimate bodies, that seem to be under anesthesia, endangered the life of the children and raises in our minds the question of their safety and the real reason of their death.

If the studied footages were edited and published to exhibit pieces of evidence to accuse the Syrian State of perpetrating the Chemical Attacks on East Ghouta, our discoveries incriminate the editors and the actors of forging facts through a lethal manipulation of unidentified children. Thus we want to raise International Awareness toward the humanitarian case of this criminal use of children in the political propaganda of the East Ghouta's Chemical Attack.

We present this work to distinguished Spiritual Leaders, Head of States, Head of Delegations, Senators, Members of Parliament, Humanitarian actors and to any person that has a heart for truth and justice and that seeks the due accountability for evil deeds ♦

INTRODUCTION

The USA and allies said that they relate to videos shown on thursday 5th of September 2013 to members of the Senate Intelligence Committee, presented by the Intelligence Committee as verified and authenticated by the Intelligence Community to incriminate the Syrian State for the illegal use of Chemical arms in East Ghouta.

The videos selected and let us say “nominated” are 13 videos that are amongst the first 35 to have been uploaded by the different video makers of the Local Coordination Committees of the rebels in the East Ghouta¹.

You can see them ² downloaded by Felim Mac Mahon. All of them are in the first seven hours of the 21st of August (still 20th of August California time). All but the N°8 were uploaded 2 to 7 hours after the alleged first impact of the chemical weapons.

Here is the list, we inserted the US Nominated Videos in the Chronology of the Events.

¹ Many thanks to Ulrike Reinhard to have listed them with the hour of their upload

Alleged CW Attacks - Chronology

Story by: Felim McMahon, corrected by ISTEAMS
Published 15.17 on 21st August 2013
Updated 13.36 on 6th September 2013

Human Rights Watch report

Activists reported chemical weapons (CW) attacks from around 0230 local time on August 21 in East Ghouta, Damascus. Only a man who alleged to be a rescuer from Zamalka affirms that the attacks began at 0155 local time.

Initial reports made reference to three adjoining locations: Jobar, Ein Tarma, and Zamalka. However, we believe that the sole location hit may have been around Zaynia in Ein Tarma, a built-up area that borders Zamalka.

Victims of the alleged attack were reportedly treat-

ed at the following locations: Jobar, Kafr Batna, Hamoryah, Irbin, and Douma. These are marked with red bullets on the maps. All of the content featured by Storyful comes from uploaders associated with the areas affected, and the areas were victims where treated.

The attacks came amid fighting in the area, with local activists reporting the downing of a chopper, that was false and the taking of a telecommunications building, in Jobar, in the hours before the attack. All times quoted here are local Syrian times.

Reports from Jobar:

At 0235, the first report of a chemical weapons attack was posted by the Jobar Revolutionary Coordination Committee here. It gave the location of the 'chemical shell' strike as Zaynia, Ein Tarma.

At 0323, a posting on the same account said chemical weapons had been used on Jobar and Ein Tarma. This was repeated here a few minutes later.

A posting at 0340 reported that hospitals were crowded with women, children and the elderly.

At 0433, the first video was posted, said to show a boy from Ein Tarma affected by chemical weapons. The uploading YouTube account was from Jobar.

At 0539, Jobar Revolutionary Coordination Committee indicated 600 wounded "in Jobar, Ein Tarma and Zaynia".

A posting at 0601 claimed that 15 chemical shells were used in the alleged attack with sarin gas. It stated that around 0300 the people died while sleeping and that the quantities available of atropine and oxygen were coming to an end.

At 6:05 am, Reuters was able to diffuse the news with solid documentation about already 200 people killed. Look at the photo. It is said to be provided by the Sham News Network.

Reports from Ein Tarma:

At 0245, Ein Tarma Coordinating Committee reported that several people in Zaynia were suffering from suffocation as a result of the town being "bombed with toxic substances". Zaynia is a high-density housing area on the border of Ein Tarma and Zamalka.

A posting at 0313 gave the location of the in-

cident as "between Ein Tarma and Zamalka". At 0315, it was reported that the cause of this was a ground-to-ground chemical rocket that exploded in the area. Again, the area was given as "between Ein Tarma and Zamalka".

At 0355, the same source reported dozens of dead among them children, women and elders at several field hospitals. With a sharp lacking of oxygen.

At 0402, the page posted images fonted with a logo belonging to media activists in nearby Erbin, tagged as showing victims from Ein Tarma. Shortly afterwards, it posted videos from Erbin tagged as showing Ein Tarma's dead and wounded.

Some postings on general postings the page listed the affected areas as Jobar, Zamalka, and Ein Tarma. For instance here.

At 0427, Ein Tarma Coordinating Committee warned of a toxic cloud spreading from Zaynia, and started posting the first videos from nearby Kafr Batna's coordinating committee. Kafr Batna was one of the areas the wounded were brought.

Reports from Zamalka:

At 0226, the Zamalka Revolutionary Coordinating Committee reported the bombing of 'the city' with 'toxic substances', but did not give any further geographical information. But the first reader below opposes this allegation saying that the chemical attacks are clearly on Ain Tarma and that the missiles passed over their heads in Zamalka and that this allegation have dropped the attention to Zamalka and weakened the attendance to Ain Tarma, provoking a supplement of casualties.

At 0245, the same source reported 20 cases of 'suffocation and fainting' here. In general, the reports from Zamalka Revolutionary Coordinating Committee refer only to Jobar and Ein Tarma as the affected locations, for instance here.

Conclusion: The only specific location mentioned by these three accounts is Zaynia, between Ein Tarma and Zamalka, which is also close to Jobar. Given the lack of precise location information from either the Jobar or Zamalka coordinating committee pages, we believe that it is possible that the attack was centred on Zaynia. In the case of an attack as described, using rockets, and centred on Zaynia, some projectiles may well have fallen on Zamalka, or even on the outskirts of Jobar. Victims sought medical attention at several locations. Casualty videos came in volume from Irbin and Douma.

A video of a rocket purportedly used in the attack has been geolocated to a spot around 200m from Zaynia by Eliot Higgins here. Having reviewed the work, we don't have any doubt that it has been correctly geolocated. An activist produced map, which we have not validated, indicates that several rockets fell in this area, along a line spanning 1km.

Moadimiyah Al Sham: Separate Attack? There were reports of heavy shelling and a separate CW attack on Moadimiyah Al Sham, which lies to the south-west of the capital. Initial reports and videos indicated a smaller-scale event, with the reported death toll attributed to CW jumping from 7 to 56 late on August 21.

0536 – Reports dozens killed by CW rockets 'in the city'. Most of the casualties are children and women. Location not specified here.

1144 – Continued shelling reported, but no mention of CW here.

1757 – Names martyrs from Moadamiyeh killed in "chemical massacre of August 21". No location for strike given here. Several subsequent posts updated on CW casualty figures from the "chemical massacre of August 21". None mentioned location beyond saying 'the city'. However, a YouTube channel from Moadamiyeh posted videos of victims here, here, and here. The videos did not show the kind of mass-casualty incidents portrayed in videos from East Ghouta.

1813 – Report puts death toll from CW at seven.

2051 – Report here named 52 casualties from Moadamiyeh killed on August 21. It is unclear from the report how many were being claimed as CW deaths.

2203 – Report here clearly links the 56 deaths listed to the use of CW.

Reports from other areas of East Ghouta: Saqba

03.17 – Report of chemical 'bombing' on Zaynia, Ein Tarma here

03.56 – Photo of child from Erbin. Report says Ein Tarma and Zamalka targeted here

04.07 – Video from Hamouria. Report says Ein Tarma, Jobar and Zamalka targeted here

09.13 – Fonted image of "chemical rocket that fell today causing many deaths" without disambiguation <https://www.facebook.com/photo.php?fbid=648713875152576&set=a.228986480458653.65498.225790024111632&type=1> Erbin

0348 – Report of CW strike in Zamalka and Ein Tarma <https://www.facebook.com/photo.php?fbid=487861254641658&set=a.430916990336085.1073741826.306150132812772>

0352 – Self-fonted image of child receiving treatment in Erbin field hospital after "CW bombing of East Ghouta" here

0444 – Video of CW patients. Geographical reference only to East Ghouta here

0502 – Video of CW casualties 'from East Ghouta' in Erbin field hospital <https://www.facebook.com/Erbin.City/posts/487879437973173>

0601 – Video of CW victims in Erbeen field hospital. No other geographical reference. here

0610 – Image of casualty of CW strike 'on East Ghouta' here Hamoryah

0352 Report of dozens dead and hundreds wounded after poison gas targeted Jobar, Zamalka and Ein Tarma here

0354 Report of tens dead and wounded in Jobar and Ein Tarma after strike by CW missiles here

0406 Video from Hamoryah uploader of CW casualties. Description mentions Jobar, Ein Tarma and Zamalka here

Several more videos posted in next 30m, all describing location of attack as Jobar, Ein Tarma and Zamalka Kafr Batna 0235 – Report of toxic bombings/choking in Zamalka (via Zamalka RCC) here

0246 – Report of targeting of Zaynia, Ein Tarma with chemical shells here

0406 – Photo of CW casualties. Caption mentions CW strikes on Ein Tarma & Zamalka here Subsequent reports and videos mention Ein Tarma and Zamalka as the areas struck by 'chemical rockets'. An affiliated YouTube account posted field-hospital videos. The location of shooting was not specified.

THE FAKE SOCIAL STRUCTURE PRESENTED IN
THE FOOTAGES

SOME PRELIMINARY OBSERVATIONS ABOUT THE URBAN AND SOCIAL ENVIRONMENT OF EAST GHOUTA

EAST GHOUTA IS A PART OF THE RURAL DAMASCUS.

Wikipedia view of the green belt of East Ghouta

The Damascus Ghouta is a green agricultural belt surrounding the City of Damascus in the South and East. Separating the city from the dry grasslands bordering the Syrian Desert, it has provided its inhabitants with a variety of cereals, vegetables, and fruits for thousands of years. While human settlements in the area date back to ancient times, an uncontrolled development of the area took place throughout the past decades. The increasing food demand by the rapidly growing population of the capital, urbanization and industrial development have increased the pressure on the agricultural lands (Wikipedia).

The explanation of the social situation of Damascus Ghouta since 2011 by Mr. Mahmoud Abdel Salam, the manager of several educational institutes in Ghouta: *Since the beginning of the crisis many families decided to leave Ghouta. They were in reality "urbanely displaced" since the prices of the real estate in central Damascus jumped a lot of the Damascene middle class decided to sell their houses and buy a much cheaper property in Ghouta. Even if Ghouta is at the doors of Damascus, it formed a rural area whose habitants were farmers. In less than three decades the population increased by ten. Those who came from Damascus had still family and parents. It was easy for the majority of the population to move out. Today Ghouta is empty. Only the families of the opposition fighters and some original habitants who did not find where to go are still there.*

PERSONAL TESTIMONY

- I was in Damascus two days before. There was the heaviest shelling from the Syrian legal army on the East Ghouta. Going out to Lebanon I have seen thousands of refugees fleeing the targeted areas.
- It means that the area that was already emptied from its population was more emptied during the heavy attack of the Syrian army.
- Hear the little orphan who was interviewed having allegedly lost his parents: "who else died among your friends and neighbors ? He said nobody they had already left or are refugees

This boy, Abdullah, does not say where he lives in the East Goutha. He asserts what everybody in Damascus and its rural area knows: *that most of the neighbors had already fled from their houses because the East Ghouta is a semi destroyed area due to the continuous clashes between the rebels and the syrian army and the violent aerial strikes and shellings from the Syria army. See the video with English footages here that have been published by the Telegraph. Co.uk/video. the 22nd of August 2013.*

- The number of casualties as reported by the United Medical Office of East Ghouta is in direct contrast with the present density of the population in a devastated urban scene.
- Here are some photos of the alleged targeted areas in the East Ghouta:

A question of urban neighborhood and demography

East Ghouta has been under massive attack by the Syrian army since more than one year (the first battle of Damascus) very little people still live there, most of them are the

families of the insurgents. The neighborhoods are in all cases devastated and so are not suitable for a real urban life.

JOBAR

Those are the practicable streets in Jobar ! Only men !

What is left standing up is used as barricade by the rebels

Devastated areas....with no more density of population.

The school....

HOW ONLY CHILDREN ???

What strikes every one is the amount of children that seem mostly sleeping, that are coming from nowhere, are deprived of family or simply lost by their relatives and that remain until the moment of their burial unidentified.

HOW WAS IT POSSIBLE TO CARRY THE CHILDREN ? WHERE ARE THEIR PARENTS ?

- First supposition : the parents were dead and the children were not. So the children were rescued.
- Second supposition: the parents were safe, the children were dead why didn't they accompany them to the hospital and...to the grave?
- Third supposition: the parents were dead, the children were dead, the children were "selected" for propaganda instead of their parents. But then why the children remained unidentified?
- Fourth supposition : The children have no parents in East Ghouta . But, then, where are they from?

THE EXPLANATIONS GIVEN BY THE MEDICAL SUPERVISORS TEAMS OR BY THE LOCAL LEADERS

http://www.youtube.com/watch?list=PLPCOUdeof3T4NORTjYmPoNCHn2vCBYvYG&v=Nh2T703cDDM&feature=player_detailpage

First report from the medical office of Jobar neighborhood concerning the attacks on East Gouta with chemical weapons.

The magnitude of the disaster was huge and the number of the victims and injuries was also so big. We consumed our stock in Jobar of Atropine and Hydrocortisone. I took out alone about 25 thousand units of Atropine from Jobar warehouse and nearly 7000 units of Hydrocortisone and about 35 thousand needles with various sizes. And, they have been distributed over the entire medical points in Jobar and Ain Tarma. The medical staff has worked with us actively and vigorously. The number of the injuries and the victims and martyrs from children and civilians was very very big. The number of children who came to us is very big. The number of children who arrived to me alone was approximately 50. They were martyrs, they did not have any signs of being alive. I moved to Ain Tarma medical point and I provided them with some Atropine. I was also briefed on the work; everybody was working very hard. Some people had to retreat to other points, but they should not have moved; they must work in the frontlines. The negative thing that happened was dealing randomly with the matter and the poor education of citizens. The gas loses its effect after half an hour, but unfortunately citizens hid in basements although the gas is heavy and it comes down to basements. This increased the damages and the number of injuries. With the descending of the citizens to the basements, the number of injuries and martyrs increased. And, the increase in the number of injuries resulted in increasing the workload on us. Thus, we had to raise the maximum readiness with our total disability. We consumed approximately 200 oxygen cylinder in Jobar and Ain Tarma medical points alone. We've got martyrs from our medical staff, may Allah accept them. Our friends also passed away, may Allah accept them. There was ignorance on

1. Ain Tarma was bombed
2. The medical points involved were Zamalka, Ain Tarma, Jobar, Deir Al-Asafeer and Douma. They participated in the work and the medical evacuation.
3. The stock of Jobar was distributed: 25000 units of Atropine and 7000 of hydrocortisone.
4. The gas loses its effect after half an hour, but unfortunately citizens hid in basements although the gas is heavy and it comes down to basements. Increased injuries: 200 oxygen cylinders consumed..
5. Martyrs from our medical staff,
6. There was ignorance on the part of citizens. In such cases, they must go to the upper floors. Some people also took the initiative to set fires resulting in the increased difficulty in breathing.

the part of citizens. In such cases, they must go to the upper floors. Some people also took the initiative to set fires resulting in the increased difficulty in breathing. This had led to more side effects; there was an overlapping of gases and inhalation of burned tire smoke and raging fire gases due to the ignorance of some people in burning tires. This thing should not have occurred. Now, we must work on a complete awareness program in the East Gouta regarding this matter. It should be addressed to citizens not to militants. In the case of chemical gases, they must go to open spaces and to the upper floors. I mean we must protect ourselves from mortar shelling, but we must sit in places which are exposed to air and where there is an air flow to get oxygen and reduce injuries; thus, decreasing the burden of injuries upon us. I can no longer talk! You can videotape the scene and the martyrs in front of you. In the name of Allah most Gracious, most Merciful In early morning hours, what happened in the frontline of Jobar was that Ain Tarma was being bombed with chemical weapons. We were aware of the situation at an early time. Thank God, we raised the readiness and the perfection of work. Praise be to Allah,, all the adjacent medical points responded to us, starting from Zamalka medical point, Ain Tarma medical point, Jobar medical point and all the remote medical points. Even Deir Al-Asafeer and Douma medical points have participated in the work and the medical evacuation, may Allah reward them will all the best.

The chief of the field hospital of Al Hajjeh Im Al Thouwar is saying the 22/08/2013

https://www.youtube.com/watch?feature=player_embedded&v=b69-lrMzEWI

Bad situation: high scores of victims mainly children and women, in their houses. The symptoms (to become blue and to foam). We were not prepared. All my team of 26 were injured. We had a lack of medicine and a lack of oxygen. There were so many victims that we had to put them in the street. Water was the only treatment. Even atropine we had a big lack of it. All the victims were sleeping in their homes and we had to break their doors to put them out, the children, the elders and the womenOnly in my hospital: 250 martyrs. 90 women, 50 children and until today I have taken out (dead) families from their homes, the neighbours were telling me that bad smell is coming out from their houses. This "nurse" is saying in the end of the video that she is a djihadist who can fire mortars and use weapons. She gives the report of the Hospital Al Hajjeh in Ain Tarma during the alleged chemical attack.

The Chief of a field hospital of Al Ghouta is saying on Al Jazirah:

This medical person is affirming: "the women came...they came... from the bedrooms, they rescued them and some of them they could not rescue them some of them went up to the roofs on the basis that the chemical gas has more effects on the first and second floor, so they were injured with the chemical gas...the rescuer were also injured with the chemical gas. See his allegations here at 8'20"

http://www.youtube.com/watch?v=c1mLcxQI_do&feature=player_detailpage#t=87

<http://www.youtube.com/watch?v=uoRoK58dErU>

It is important to note that, following the declarations of the medical team Spokespersons:

- The victims were rescued *in situ*, at home, where they were sleeping. Thus the locations of the victims were familiar to the rescuers so that they went immediately to help them. But then, why so few victims were identified?
- There is a contradiction in the stories. One says that the victims went to the basements and, thus, suffocated, because of the poisonous gas is heavier than air and would spread in the lower spheres. Another says that the victims went up to the roof and there it was safe for them.
- One says that he distributed huge amounts of medicines. The other says that people died due to the lack of medicines.
- Nobody gives any explanations about the high rate of the children among the victims and why they were brought alone to the medical points without their parents.

THE RESCUERS AND THE MEAN OF TRANSPORTING THE VICTIMS

Mohammad Al Saïd, member of the Revolutionnary Commandement of East Ghouta affirms that: People were sleeping in peace Then he contradicts himself saying "the children, the women, came to us with their pyjamas. All the children were sleeping in peace and the ambulances are still coming to here with the victims.

http://www.youtube.com/watch?feature=player_detailpage&v=sZuYpsZZTic#t=8

These affirmations are not patent in the footages. It is very strange that throughout all the ongoing rescue actions captured in the videos, the sound of an ambulance is heard only two times and only twice do we see an ambulance in action :to bring one sole child to a medical point and to transport the corpses for the burrial. We see two private cars carrying each time ONE child. How to explain the transportation of thousands of victims to the different medical points, especially that some victims were transported to farther places? **There is complete mismatching between the alleged number of victims and the almost inexistent outdoor movement.**

<http://bambuser.com/v/3832579>

It is the night, this man is carrying two little children. He doesnt wear any mask, see here. The video is from Jobar neighborhood.

Then the rescuers washes her, and shows her extensively to the camera. Then he expresses his disarray and anger. Our questions: Why to bring ONE little girl in the car. If she is dead why to "wash her" ? Where are her parents.

In this section...A car arrives

And inside a girl is brought whose name is Darine...Where are her parents ?

https://www.youtube.com/watch?v=pEk_mQOb9-4&feature=player_detailpage#t=149

THE SOCIAL STRUCTURE OF THE EAST GHOUTA POPULATION DURING THE CHIMICAL ATTACKS

THE WOMEN

Very little women are seen in the videos that document the alleged chemical attacks
It seems that the mothers are just absent

This woman in black is present...here, see photo
<https://www.facebook.com/photo.php?fbid=575063152551119&set=a.482791811778254.105354.476009109123191&type=1&permPage=1>

And here, after the children are dressed in white, see video in Douma

https://www.youtube.com/watch?v=v_GfME1KBos&feature=player_detailpage

One of the very rare where a woman is shot on the video tape, see here
https://www.youtube.com/watch?feature=player_detailpage&v=PXwS4_E3OQE

A woman laying on the ground, see here

https://www.youtube.com/watch?feature=player_embedded&v=AqCDSq_BXKo

Two women with a gunman in good health.

https://www.youtube.com/watch?feature=player_detailpage&v=PXwS4_E3OQE

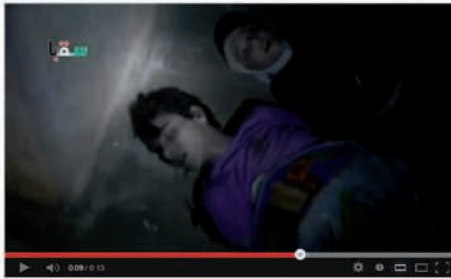

The warehouse is only filled with women corpses

http://www.youtube.com/watch?feature=player_detailpage&v=yp_Ju6742ZO#t=14

They are absent, 2 or 13. No parents are ...

THE FAMILIES

Two plausible figures of a family killed at home while sleeping. But why are they lying on the ground and how are they wearing their clothes and not the pyjamas?

https://www.youtube.com/watch?v=GClAquN8dzg&feature=player_detailpage

https://www.youtube.com/watch?v=-LzKqgpk_TA&feature=player_detailpage

Parents supposedly to say goodbye to their children but they are standing before adults. How their children traspessed and they are safe ?

http://www.youtube.com/watch?feature=player_detailpage&v=47fYGEsKaM&list=PLPCOUdeof3T4NORTjYmPoNCHn2vCBYvYG

PARENTS RECOVERING THEIR CHILDREN, DEAD OR ALIVE : THE UNSOLVABLE DILEMA

This man is crying the death of two of his children. Where was he ? Where is their mother ? Why only they are dead and not their parents. Can the chemical gaz differentiate the children from the adults ? see video here

https://www.youtube.com/watch?v=knzuMkD6USI&feature=player_detailpage#t=82

Here the story is more weird: a father is "safe" and some men bring to him his son alive: good occasion for a very emotional moment. But the scene seems a local production: how come that in a normal civilian neighborhood we see only men? Where are the women? How could this man "lose" his child? How is he "waiting" at home while he knows that hundreds of children are dying? The scene is artificial and does not convince.

The men are sitting in a chair prepared for the screening: in the entrance of the building where are parked the motorcycles is not a living room. The man nearby the afflicted father explains calmly: I have lost my three children and their mother while he was possible during the shoot and was "happy" that his neighbor will "take back" his child....

I am searching for my cousins, I found them, there are 5 to 6 children, see video
http://www.youtube.com/watch?v=yp_Ju6742Z0&feature=player_detailpage#t=440

This is a man with his children, a girl and a boy, he is wearing his pants with a belt, see video. He has been recognized as single.
http://www.youtube.com/watch?v=yp_Ju6742Z0&feature=player_detailpage#t=446

This girl her mother is dead but we will find her and this other one his mother and his father are missed. At least one child is sleeping with his clothes. See here
http://www.youtube.com/watch?v=yp_Ju6742Z0&feature=player_detailpage#t=448

A woman searches for her child? Why did she lost him? see here
https://www.youtube.com/watch?v=knzuMkD6USI&feature=player_detailpage#t=97

Kafarbatna family: here too, children and adults male. No woman
http://www.youtube.com/watch?v=QNFP31HraPO&feature=player_detailpage#t=77

THE STORY OF AN ALLEGED MOTHER AND A FATHER SEARCHING FOR THEIR CHILDREN SCATTERED IN FIVE DIFFERENT PLACES

The woman dressed in grey come to a warehouse where dead women are gathered to "search" for her children. She found one but his corpse appears to be that of an adult!

We are in Zamalka.

This woman is searching for her child and she finds him says the reporter not seeing that the corpse is an adult's one, see video

http://www.youtube.com/watch?v=yp_Ju6742Z0&feature=player_detailpage#t=219

The same woman continue to search for her "children, her sisters and others", along with a man whose wife was killed and who is searching for a dear one, see video

http://www.youtube.com/watch?v=yp_Ju6742Z0&feature=player_detailpage#t=373

Both are wandering in the Zamalka depot here

http://www.youtube.com/watch?feature=player_detailpage&v=yp_Ju6742Z0#t=2

This same woman says good bye to another child in... Irbin, see here

The video is titled "very moving the moment a mother finds her child". The same woman dressed in grey finds another of her children. The man in white is still with her. See here

THE CHILDREN THAT SURVIVED

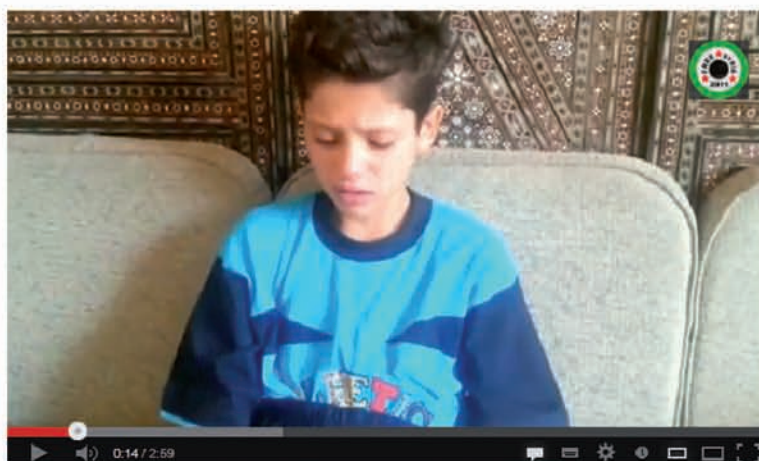

https://www.youtube.com/watch?feature=player_detailpage&v=rmPxQBtAFwA#t=35

This boy have his eyes tampered to show sadness. He says "When my brother smelled the odor of the gas, like gunpowder he begun to vomit (While we know that the sarin gas is odorless), let us say to die, my father and my mother gave him water and he begun to have difficulty of breathing. My mother smelled the odor of the gunpowder and saw that my brother has laid down she also laid down...I was sitting on the sofa and I was far from them I did not have anything, I don't know how I arrived here. I lost my parents and my brothers and sisters" I hear here

This other boy called Abdallah asserts that most of the neighbors had already fled from their houses because the place where he lives is a semi destroyed areas from continuous clashes between the rebels and the syrian army.

https://www.youtube.com/watch?feature=player_detailpage&v=wkWdY2Vh1nI#t=35

http://www.youtube.com/watch?v=HGh3u3CXJ1w&feature=player_detailpage

We were sleeping at home and they fired chemical weapons, my father told us go out so we went and saw a man cut in pieces, dead on the ground and I saw my parents fainting and I don't know where they are. My father, my mother, my sister died and they were taken in the trunk of the car. My name is Mazen Halawa and my uncles ares from Saqbe. I didn't see anybody dying from the chemicals. I only saw a man in his blood while going out with my parents

THE INJURED PERSONS

There is a lot to say about the injured persons. While ten to twenty people could surround one dead child, you will find persons that are allegedly dying without any help. But only forensic and specialized doctors can handle this subject.

The footages show a blurry reality of medical cares in the field hospitals and in the medical points of East Ghouta. Was it necessary to put everybody everywhere without order? Who is receiving the victims? What are the logical steps of a treatment? It is like an hecatombe that the careless way to administrate the medical cares and treatment makes more dubious. How is it that in all the videos that are recorded in many different places we see the same arrangements ? Many questions that only a very long and detailed investigation will answer.

This young man is alive and he moved his arms to open them as if he was dying....

It is obvious that, in a night like this, nobody would nurse dead people. So if this victim was alive when he was treated how did they put on him the waste of a medical supply ? It seems like forged attitude, a staging....

In a moment that is one of the terrible rush, note in the left corner of the screen a man looking at his cell phone. This man and the other wearing the wine shirt are just turning around quietly and spending time.

UNLAWFUL PROPAGANDA

There are innumerable places in the footages that show unfair "arrangements" to "convince" about the reality of the Chemical Attacks and about the perpetrator. But the perfection of the production did not hide many defects that any person with common sense can highlight.

A still image uploaded by activists the 21st of August. It shows animals killed by the inhalation of the poisonous gaz. How was it possible to gather those animals while thousands of human beings were dying and in bad need for any help?

http://www.youtube.com/watch?v=eF4GF1ysNm8&feature=share&list=UUdqy0MJox2GUa_9R_ILNbGQ

USING THE PHOTO OF THE MASSACRE OF RABIHA AL ADAWIYA SQUARE IN CAIRO AS BEING THE VICTIMS OF THE CHEMICAL ATTACKS IN SYRIA !

«صور» المجزرة البشعة لشهداء مذبحة رابعة العذوية والنهضة
وغل هذا التلوين للسياسي

The photo of the victims of Adawiha Square in Cairo, Egypt

The original photo is from the Egyptian revolution

تفسيرية مساهمات برقة - الثورة السورية في دمشق
التي هي 2 مساهمات
التي هي الشرقية : اعداد الشهداء في تزايد جراء المجزرة الكيماوية
The same photo is used by the Syrian opposition stating that those are victims of the chemical weapons attack !

The same video as been used by the LCC of Masaken Barzeh to signify the victims of the chemical attacks!

We need a whole team with hours of research to study all the faces and the clothes of the victims to "track" them and know better the process of their gathering, their moves, their trespassing and their burial. The main question remain: who are they? who killed them? when? We made some investigations on three nominated videos by the US Intelligence Community that convicts the legal authorities to have use chemical attacks to produce a massacre. The results are striking! There is an evident propaganda manipulation.

ABOUT THE VIDEOS N°1 AND N°6 NOMINATED BY THE UNITED STATES INTELLIGENCE COMMUNITY TO PROVE CHEMICAL ATTACK

Video N°6

http://www.youtube.com/watch?v=Htne_krCJ_E&feature=player_detailpage

The nominated Videos N°1 and N°6 are linked together. Both have a scenario that turns around a little boy with a red shirt who is suffering. N°6, produced by Jobar Local Coordination Committee, was uploaded 3 minutes and the half after N°1 which is a production of Hamouria Local Coordination Committee.

N°6 is previous in the chronology of the action: the clothes of the little boy are still dry. He is like in agony, shaking on a ceramic tiles floor. He seems alone.

Video N°1

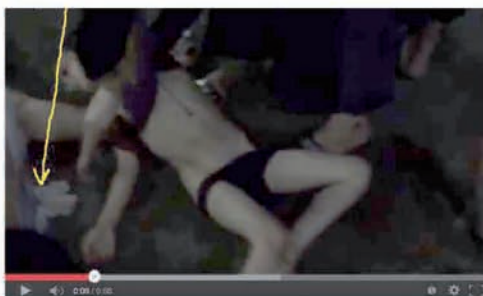

<http://youtu.be/kgQAWIOPQ-M>

In the video N°1, the same boy is all wet with a rose towel on his shoulder. A woman dressed in black with an orange scarf gives him pats on the back. Then she reclines him on the arm opened of a man laying on his right.

Let us note that the floor is not tiled with ceramic. It is another station for the little boy who, in the video N°6 was agonizing on white ceramic floor. .

A very important detail that we have to note is that between the man and the little boy, on the floor, there is the presence of a cylinder. A man comes, always in the video N°1, and takes the cylinder.

Video N°1

In the background there is a scene with the rescuing of a little boy wearing a striped shirt in white and green. The nominated video has many excellent features to deserve to be nominated. BUT....

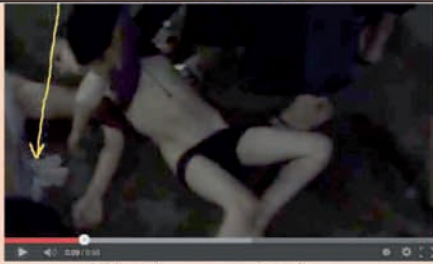

Video X

We have found a Video, produced by the same Hamouria LCC (https://www.youtube.com/watch?feature=player_embedded&v=DIYSmoa6BUs) This video presents another scenario of the little boy's agony .

It begins with the rescuer taking the cylinder to make an injection. In reality it is a medicine flacon. And the scene continue in this video in a complete different way than the video N°1. Let us make a comparison between both videos; The results are shocking....

READ FROM DOWNWARD AND COMPARE STEP BY STEP VIDEO 1 & VIDEO X

NOMINATED VIDEO N°1	VIDEO X
 The flacon on the floor	 The flacon on the little boy's chest
 Behind there is a scene with a boy wearing a green and white striped shirt	 Behind there is a complete other scene and NO boy with green and white striped shirt.
 The little boy with a striped white and green shirt is being <u>rescued</u>	 The background is distinct between the two videos....no little boy with white and green....
 And behind we see three little children laying down. The first in rank is with a red shirt. The second is with a white shirt	 Here, in the same action, we see that the child in the first rank is with a white shirt that is not rolled up. The position of the children is also different

continue your comparison please in the next page

TWO SCENARIOS? BUT WHAT ABOUT THE CHILDREN? WHERE THEY UNDER ANESTHESIA OR WHERE THEY KILLED FOR THE PURPOSE OF THE PROPAGANDA? THE INTERNATIONAL COMMUNITY SHOULD HELP TO ANSWER FOR THE SAKE OF THOSE INNOCENT CREATURES!

Then, after the screen manipulations, the children, still breathing, are left alone without any care. This last video is done in Zamalka. Finally we see the little boy with the red shirt trespassed with many other children...In Jobar.

ABOUT THE VIDEOS N°11 NOMINATED BY THE UNITED STATES INTELLIGENCE COMMUNITY

This video (http://www.youtube.com/watch?feature=player_detailpage&v=ZkGa2jr9MBA) is produced by Kafarbatna City. It shows the "martyrs" fallen in its area and has been uploaded the 21st of August at 08:32:59.000 Damascus time. It shows a suite full of inanimate bodies of children and adult males. In a corner it seems that the wrapped bodies in color are those of the women. The title of the video on YouTube says: *More than one hundred martyrs that were rescued namely to Kafarbatna, due to the chemical attacks the 21/8.*

Children

Males

Females ?

This nominated video raises serious problems concerning the manipulation of bodies of innocent people, especially children, alive or dead. This manipulation is a grave infringement of the laws of honest information but, in the case that death were provoked intentionally it falls under the procedure of criminal cases.

We have recognized the same room in a documentary of Al Jazeera. The shooting of the room in this documentary is about an early arrangement of the mortuary groups. We see heredown the same room with only six children and one male. Strangely they are in the same position they will have when the room will be full. It means that it is not a spontaneous action of the "victims" that the footage transmit to us but rather a scenographic arrangement which could be acceptable if the scene setting was not with dead corpses. If those people have really fallen during the chemical attacks why all those manipulations with their bodies ? Where did the producers and the rescuers find the time to cure, treat, heal, accompany and dispose bodies for a specific scenario?

http://www.youtube.com/watch?feature=player_detailpage&v=clmLcxQI_do

The flat and its annexed rooms. The children seem to have been treated, we see setinges waste and cotton in their noses

General configuration of the room where the bodies are placed we see also an adult male

We conclude from the comparison with the two videos

1. *the room was first scarcely occupied with some bodies.*
2. In the nominated video N°11 the empty spaces seen in Al Jazera documentary are “filled” with 15 other bodies without moving the previous 7 we talked about.

Al Jazera documentary

Nominated video N°11

The previous bodies are surrounded with yellow: 6 children and one adult male
What we see is an evident unfair scenographic arrangement.

The first question here: how was it possible to add new bodies without moving those who were there first. Why was it done like this ? Are those children and adults alive or dead? If they are alive, why to put them like this so much one nearby the other so that it is difficult to reach each one? If, sadly, they are dead, what are doing the “nurses”? We see one sitting on the body of a male laid down. She has a needle and she is injecting something.

What is the nurse in the right corner injecting and this men above why is he injecting ?

The nominated video N°11 was uploaded the 21st of August at 08:44:40.000Z Damascus time. How is it possible that 4 hours after the chemical attacks so many corpses are gathered and arranged in a theatrical manner ? How is it possible that Al Jazirah dispose of an ongoing arrangement for a final shooting? ¹

We are horrified when we realize that many of the above laying children, let them be alive or dead, are yet disposed in another place in another room in another City.

We have done the following comparisons:

¹ The upload is said to have been done the 23rd of August 2013 at 00:52:04.000Z UTC time or 03:52:04.000 Damascus

The video at the right has been produced by the Press Office of Al Marj Region. It shows inanimate children laying on the ground in disorder. At least 9 of those children have been transported from Kafarbatna out of any medical or humanitarian explanation. It seems that the trafic of the bodies is to obtain, every time the best compilation to evoke to the international Community in the most expressive way the tragedy of the Chemical Attacks.

Another detail: the girl dressed in yellow, is layint in a scene that is said to be situated between Zamalka and Aïn Tarma. But we have found her figuring in another video, in Jobar !

http://www.youtube.com/watch?feature=player_detailpage&v=PGW9L2uK4Dy

Moreover, the two males that are seen in the nominated video N°11 in the first room with the children are also seen in this video of Al Marj: they have been transported to another place,

To conclude we can affirm : it is impossible to do all this arrangement in few hours. This means that the footages were realized BEFORE the event. This will raise crucial questions.

And before closing the problems raised by nominated video N°11 we have to address the fact that the sister of the little girl dressed in purple from the nominated video N°13 has been transported to figure with those children called the martyrs of Kafarbatna.

The two sisters are found in the nominated video 13 and in another one, both located in Erbin. But here is that the corpse of one is found in Kafarbatna !

CONCLUSION: How is it possible to carry corpses from one place to another when hundreds of victims were allegedly in need of care and of human resources with very little margin of time? Who are those children? Why are they used as a media tools without fearing to desecrate them? Where are their parents? What hides behind the video n°11 is scary.

We need to find out who are those children, where are their parents ? Are they alive or dead and the real reasons of their death ?

ABOUT THE VIDEO N°13 NOMINATED BY THE UNITED STATES INTELLIGENCE COMMUNITY TO PROVE CHEMICAL ATTACKS

A man is bringing indoor by night a little girl dressed with a purple shirt.

http://www.youtube.com/watch?v=JqVeCVovF58&feature=player_detailpage#t=4

Uploadat 00:50:47.000Z UTC time=03:50:47.000Z Damascus time

The girl on a [close up](#) appears to be without life (sequence 0:44).

The man says this with high emotion: " Oh Arabic Nations, O United Nations for God sake, those are children ! (???)they are dead, they were killed with chemical weapons. You killed them O Bashar, do you know what they have done before they arrived here? Do you know what **they** have done before **they** went to sleep ?Before sleeping this girl told me "**father!**" just before (her mother) servedthe food to her, she said " this one, I do not want to eat, this (food) is for my brothers and sisters?". Because of the siege from bread and food, what shall I do? Look, look, (and he shows the inanimated faces), (killed) with chemical, with chemical!"

It is obvious that this man is talking about this "daughter" and her sister, that he shows to us, weeping.

And he puts her on the ground nearby another little girl, her sister, and an inanimate man.”

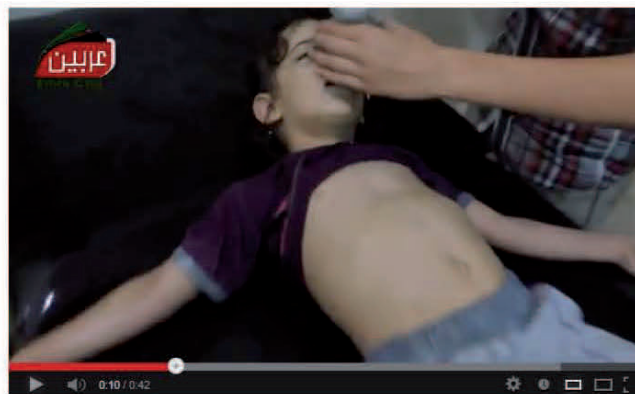

http://www.youtube.com/watch?v=JqVeCVovF58&feature=player_detailpage#t=62 (at 1:02)

We have three major problems to resolve that prevents us to believe in the Bona Fide of the producer of this video and the videox that are related to it.

FIRST PROBLEM

We have seen that the girl in the video N° 13 was inanimate and her father is shouting with emotion that she has been killed with chemicals. BUT in another video upload by the same source (ERBIN CITY) 10 minutes later, the same girl is still ALIVE and being treated only with light health care. Her alleged father is NOT in the room and the rescuer who is taking care of her is saying: *“I rely on God He is the best Provider: these are cases of fainting due to the inhalation of poisonous gas”*. She does not seem in a critical phase.

http://www.youtube.com/watch?feature=player_detailpage&v=PXwS4_E3OQE#t=10

Upload at 01:00:54.000Z = 04:00:54.000Z Damascus time

Her "sister" is with her on the other patient cart

We can see the little girl in purple from another angle inside the [medical point](#). But it seems that she has fainted. See the video of [Erbin City](#)

In the light of the second video, the nominated video N°13 raises different questions of timing, editing and uploading as well as those, more crucial, concerning the identity of the girls and the causes of their death.

SECOND PROBLEM

Here is the man who is carrying the girl in purple, saying that she calls him "Father", meaning that he is her father.

http://www.youtube.com/watch?v=JqVeCVovF58&feature=player_detailpage#t=14 (at 0:14)

Here he seems to find her daughters again, they are laying with the "crowd" of children, on the right of the little girl in purple is another girl in pink.

The "father" enters in the minutes 15:48 saying: *"Let the one who speaks about chemical stop lying to us."* And he curses the Arab League, the United Nations etc... on the head of the girl with the purple shirt.

Uploaded 02:37:00.000Z UTC time = 05:47:09.000Z Damascus time

Questions: How did this father accepts that his daughters are to be buried within a mass ceremony. Where is the mother of the girls? Where is the family ? How is this man alive while his daughters have perished.

This man, in another video, uploaded 1:30 later, in the same place, takes a baby boy and ask: "is this a terrorist?"

http://www.youtube.com/watch?v=evHgj4dnF9k&feature=player_detailpage#t=10video 23

uploaded 03:58:38.000Z UTC time or 07:28:43.000Z Damascus time

Now his two daughters are alone with the man that was with them in the nominated Video 13, uploaded one hour and half before. Six little corpses have been removed, or added.....

Our question: two little girls, alive or dead, have been transported in less than 3 hours from their house to the medical point than to a room where there have been two reorganization of corpses, all this accompanied with a propaganda from the "father"? How can it be while 1466 people are dying and in need for urgent care?

THIRD PROBLEM

In the second video related to the little girl in purple we see a young boy lying on the patient cart on her right. The video source is Erbin City. The horodation is 21st of August at 01:00:54.000Z UTC time or 04:00:54.000Z Damascus time.

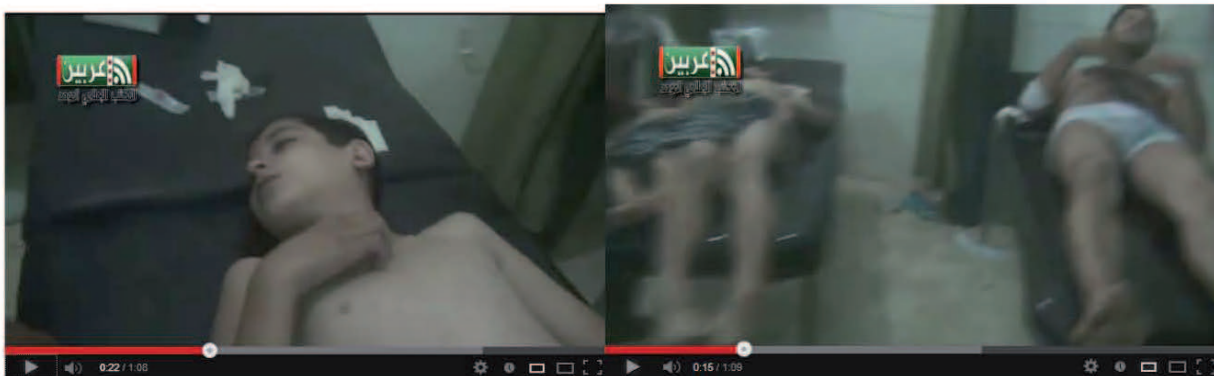

http://www.youtube.com/watch?v=PXwS4_E3OQE&feature=player_detailpage#t=4

01:00:54.000Z UTC time or 04:00:54.000Z Damascus time

The boy is wearing a flannel shirt and a black trouser with two white strips. He does not seem in a critical condition . The little girl in purple lies on his left, she is alive and does not seem in a critical condition.

http://www.youtube.com/watch?v=PXwS4_E3OQE&feature=player_detailpage#t=8

This same boy is seen in another video in the same place but naked, on the same patient cart there is a baby and on the patient cart at his left there is an adult male.

http://www.youtube.com/watch?v=QOBX45HdkyQ&feature=player_detailpage#t=22 (at 0:22)

upload 01:57:53.000Z UTC Time = 05:37:00.000Z Damascus time

The Problem is that between the upload of the two videos there is 1h and 37 minutes. How is it possible that in such a short time all the staff is changed, and the patients + the rescuers are now more than 40 while there is no appearance of any more influx of patients in this emergency room ? And the same question: Where are the parents? Where is the mother? How is those little ones dying ?

Here is the room earlier and later

Before

After

http://www.youtube.com/watch?v=QOBX45HdkyQ&feature=player_detailpage#t=27 (at 0:26)

Conclusion

It seems there is a featuring that does not match with the dramatic intensity of the event. It has all the appearances of a heavy media manipulation, unless there is also something worst concerning the medical condition of the injured people, especially the children, and the reason why they die alone and why their parents are not with them.

ABOUT THE VICTIMS

THE REPORT OF THE UNIFIED MEDICAL OFFICE OF EAST GHOUTA

In the name of God the Merciful,
About two in the morning, on Wednesday 21, 8,
Eastern Gouta, in Zamalka Ain Tarma region, suffered indiscriminate shelling by Assad's forces. Mass suffocation and death cases started arriving to all medical points and field hospitals in East Gouta .
All the medical staff, paramedics and activists were called to deal with casualties from Zamalka and Ain Tarma.

Injury evaluation was very confusing because of the sheer numbers. More than 30 % of the injuries were severe. Hence, most of the patients were transferred to other medical points and field hospitals.

Clinical panel of patients was very broad and included the following signs and symptoms:

- Respiratory difficulties of all levels.
- Heavy foam mucous secretions from the mouth and nose
- Generalized non-descriptive convulsions
- Agitation
- Pallor
- Heavy sweating
- Vomiting
- Narrowing of pupils
- Slow pulse
- Inflammation, especially in the upper part of the body

These symptoms indicate case of poisoning with organic phosphorus compounds.

Statistics in the medical points:

- 10,000 injured during the first six hours.
- More than 3,000 serious conditions.
- 1466 Martyrs
- We note that 67% of the casualties were women and children

We reaffirm that these statistics were inside the medical points. And until now, a lot of patients still come back to us due to recycling toxic material in the patient's body, as a sickly physiological mechanism. Medical staff got poisoned by toxic substance through contact with infected patients in the absence of preventive solutions. Some of them died and others are now under treatment. Consequently, the United Revolu-

tionary Medical Office announces Eastern Gouta as a disaster area, and called on the international community to assume its responsibilities and stop inaction about the tragedy of the Syrian people, and emphasize the following:
First: The entry of the Observers Commission immediately to Ghouta to document what happened before the demise of the toxic substance due to its short half-life.
Second: We call on all organiza-

tions and medical relief agencies to act immediately, and freely to enter Ghouta to cover the deficit of medicine, medical consumables, equipment and relief services.

Third: We call on all free international human rights organizations in the world, to do their humanitarian job, and be responsible towards the tragedy of the afflicted Syrian people. Peace be upon you and God's mercy and blessings.

ABOUT THE VICTIMS

WHO ARE THEY, SPECIALLY THE CHILDREN ?

CONCLUSION: Those affirmations find us very skeptical: In the context of a dense urban neighborhood, where people are "sleeping": where should the rescuers choose to go ? The gas is invisible and odorless. Nobody knows where it is spreading. We know that the sarin gas is extremely volatile. The real danger was for those who would go out in the midst of the gas. So how could the rescuers move immediately without any adequate protection material and how could they afford to arrive to houses with injured people, to manipulate them and to rescue them with only handkerchiefs and tissue masks? "The martyrs are 865, they are all unidentified. They are numbered on their fronts as you can see..... http://www.youtube.com/watch?feature=player_detailpage&v=yp_Ju6742Z0#t=238

Let us go back to the declaration of Mr. Mouhammad Al Saïd, the member of the Revolutionary Commandment Council of Rural Damascus, supervising the making of the documentary of the chemical attacks in Zamalka:

He affirms, : "All the victims here are women. Of course all the victims are unidentified, they have a

number. Most of the bodies are women and children, 865 martyrs registered by names in the provinces of in East Gouta. The Syrian regime bombed areas in East Gouta, 3 kilometers away from the human rights committee sent by the United Nations to detect chemicals in Syria. No one reacted. They all denied that the Syrian regime used the chemical weapons. These bodies that we see all of East Gouta with dozens of cities in East Gouta.

The reporter says in the depot house: "We see here the corpses of the victims. The foam, sign of the influence of chemical is coming from their mouth. We see the children, like flowers...those children are victims of the criminality of the Syrian regime. We see numbers on their fronts. They are numbered so that if their parents they come they will be able to recognize them. Maybe their parents are injured like them, maybe they have been killed, maybe they are searching for them, they do not know anything about them. It is a dramatic scene. Children aged some years....Their only guilt is to be sons of Ghouta".

http://www.youtube.com/watch?feature=player_detailpage&v=yp_Ju6742Z0#t=578

And until today on the Zamalka Facebook we see tens of faces that have no name: Unidentified.

The majority of those victims are unidentified. It is written on their shrouds and the facebook pages of the opposition in East Ghouta are full of pictures that are presented to be able to identify the victims. How come that in a besieged neighborhood where everybody is united by the same fate there are so many unknown?

WHAT ABOUT THE DIFFUSION OF THE DEATH TOLL?

Very quickly the Local Coordination Committees diffused the death toll

A number of victims was posted at 03:39, 39 minutes after the beginning of the presumed chemical strikes: This post on the facebook of the Local Coordination Committee of Haran El Awamid shows it.

BUT it has been "corrected" since then, here <https://www.facebook.com/haranalawamid/posts/622077987824736> like this:

الحصيلة الميدانية 1188 شهيد
 نقطة سقيا: 100 شهيد
 نقطة كفرطنا: 100 شهيد
 نقطة دوما: 150 شهيد
 نقطة جمورية: 300 شهيد
 نقطة عرس: 30 اطفال , 16 نساء , 17 رجال أي 63 شهيد
 نقطة جسر: 16 بينهم 3 اطفال
 نقطة زمكا: 400 شهيد
 نقطة المرج: لم يضل بعد
 نقطة عين ترما: 75 شهيد
 العدد الميداني للقوطه: 1188
 العدد لا يشمل المعصية
<http://www.youtube.com/watch?v=Nh2T703cDDM&feature=youtu.be>
 ...(&الماروق&)...

In all cases, at 13:39 this LCC could count 1188 victims. But in the videos the number of victims do not raise to more than 500. If we count everybody, even when there is a duplicate.

See also the final statement of the General Coordination of the Local Committees here.

<https://www.facebook.com/notes/ي.ف.ق.ل.ح.ل.ا.ق.ي.س.ن.ش.ل.ا.ن.ا.ج.ل./about-the-chemical-massacre/727097270650745>

There is no explanation how come that in all the death depot we find only children and males while women are in a very reduced number. They are not more than 10%. If there are so little mother how can the children toll so high being a lot from the same age?

THE IMPROVISED MORGUES

Trying to track the children and other alleged victims we have discovered that very quickly the rescuers had improvised morgues in Erbin, Kafarbatna, Jobar, Zamalka and Douma. This other with Jobar shows the final dressing of the trespassers, all wrapped in their white shrouds.

Erbin improvised morgue. A high percentage of children and males.

Jobar improvised morgue: only children and adolescent.

Kafarnatna improvised morgue
http://www.youtube.com/watch?feature=player_detailpage&v=ZkGa2jr9MBA

Zamalka improvised morgue.

https://fbcdn-sphotos-a-a.akamaihd.net/hphotos-ak-prn2/1239599_575063152551119_53692725_n.jpg

Douma burial preparation room

https://www.youtube.com/watch?v=VITsAJzFC2E&feature=player_detailpage

THE LAST STEPS OF THE VICTIMS

It seems that the victims were gathered in four dead depots: Kafarbatna, Erbin, Zamalka and Jobar. The "burial" seems to be in Douma where the victims are transported to a tent. We see one small burrial group in Jobar.

The victims are wrapped in white shrouds

They are mourned by the islamist clerics of rural Damascus

A "jihadist" wearing a turban and an afghan cloth is chanting Sourates from the Coran for the burial of the victims see here.

https://www.youtube.com/watch?v=Jk-UJkhYc5I&feature=player_detailpage#t=134

All the victims in the Douma warehouse are childrens and young men here

https://www.youtube.com/watch?v=Tpk4MPpWYPk&feature=player_detailpage#t=0

Burial group in Jobar

http://www.youtube.com/watch?feature=player_detailpage&v=ctd71HqzDR8

The corpses are put outside the tent and the cheikh Saïd Dalwan Abou Noaman, the head of the Council of Shoura, says a homily.

THE BURIAL

After those preliminaries, begins the burial. BUT no evidences of more than EIGHT corpses buried. Among them three are not wrapped in white ???

It is very surprising that only 8 "victims" are burried, among them three without a shroud. Funerals, mourning and condolences have been almost inexistent.

In Douma cemenetry they are burying but we do not see the corpses and we do not know how many, see video here http://www.youtube.com/watch?list=PLPCOUdeof3T4NORTjYmPoNCHn2vCBvYg&v=bxNi8vH0WDI&feature=player_detailpage

The custom in Syria is that each single martyr deserves an official burial like this one in Maddaya.

THE CRUCIAL QUESTION

Eight corpses are seen burried.

Remain 1458 corpses ? Where are they?

Where are the children ? and the women ?

Moreover: There have been no public burial, neither the announcement by the Muezzin as usual. Nobody heard of obituary notices neither a mourning tent was hold. The parenthood of those regions did not express the loss of a dear one. In Orient everybody is related to everybody and 1466 deaths are like a social hurricane. This is a real mystery that the lack of graphic evidence of the burial makes enigmatic. The neighborhood as seen in the map in the first page are not far than 3kms from the central Damascus. There is a continuous crossing from the civilian population from the so called "liberated areas" to the areas under the government control. The silence and, even, the social inconsistency of the reality of the "martyrdom" of the victims is a tricky problem. We think that there must be a "recognition" of the collective pits to be able to have an idea of the whole situation.

http://www.youtube.com/watch?feature=player_detailpage&v=LRDXgualsMw

AFTERMATHS

After like during the tragedy we find in the footages only children and young adults in East Ghouta !

After the tragedy, the region are habited only by adolescent and adults males See the video here

https://www.youtube.com/watch?v=zRMVwXRNtDO&feature=player_detailpage

During de visit of UN investigators :
Only adolescent and adults males

In reality the adults males are the members of the free Syrian army contingents and the UN Commission of Enquiry

https://fbcdn-sphotos-a-a.akamaihd.net/hphotos-ak-ash4/1000340_566360740079023_1929310521_n.jpg

THE ABDUCTED CHILDREN AND ADOLESCENT FROM LATTAKIAH

The videos heredown concern the facts of the abduction of tens of Alawites civilians jut prior to the Chemical Attacks. We refer also the list of the victims of the invasion of 11 Alawite villages in Lattakiah the 4th of August 2013, were 150 women and children were abducted by Jobhat Al Nosra. We launch an appeal to the International Community and to Interpol for a warrant of Research and Investigation especially concerning the fate of the children and adolescents.

We have seen in the study of only 3 nominated videos how big have been the manipulation. Everything points out to a FORGED STORY and a FALSE FLAG concerning the alleged Chemical Attacks. We need to know more about the fate of those civilians.

Jubhat Al Nosra Spokesperson shows 150 women and children abducted from 11 villages in the Lattakiah mountains claiming that the purpose is to exchange them with some detainees in the Syrian jails. The footage is produced by the Mujahedeen Press Office
http://www.youtube.com/watch?feature=player_detailpage&v=SPe7tu_3dpE

Women and Children are driven out of the Province of Lattakiah by Jobhat Al Nosra
On the right, tens of civilian are abducted in Rabiha.

https://www.youtube.com/watch?v=FdF6aSnxhDs&feature=player_embedded#t=130

CONCLUSION

Concerning the alleged Chemical Attack on East Ghouta, the International Support Team for Musalaha (Reconciliation) in Syria has studied some of the 13 videos nominated by the US Intelligence Community to exhibit pieces of evidence to incriminate the Syrian State.

We have found that three nominated videos present evidence of artificial scenic treatment using the corpses of dead children.

Studying the whole videotaped documentations available on line, from the point of view of the structure of the Syrian society, we find that the civilian population in East Ghouta as presented in those videos is inconsistent with the composition of a real Syrian civilian society. There is a flagrant lack of real Syrian families in East Ghouta, as presented by the videos. So with the terrible sense of the existence of a horrible crime, we ask: Who are the children that are exposed in those videos?

From where do they come? Where are their parents? How did they get killed? Where are their corpses buried?

We think that with the evidences of media manipulation that are shown in the this Study and other studies, there is a moral obligation to launch an International investigation and arrest Warrant under the yellow and black notice to find and identify the Syrian children bodies used in a criminal way in the so called Chemical Attacks of East Ghouta.

On the other hand, we are in close contact with the survivors of the horrendous massacres perpetrated the 4th of August 2013 by Jobhat El Nosra and al-

lies in eleven villages from Lattakiah mountains. As Reconciliation Committee we are trying to liberate more than 150 women and children, abducted under the pretext to exchange them with detainees. We have been contacted by the families of some abducted women and children. They recognize their relatives in the videos published online that show the alleged victims of the Chemical Attack in East Ghouta.

Some families have filed a complaint to the Syrian authorities in Syria. They need to be heard on an International level. We need to help raise International Awareness toward the humanitarian case of the criminal use of children in the East Ghouta Chemical Attack. **Would you join us?**

There is an urgent need for an independent and unbiased International Commission to see where are the children and what is their identity. Should they have died, their corpses need to be found to proceed to a DNA investigation. Only then total light will be shed on this historical case of mass manipulation.

Agnès Maximilien de la
